**My application to your advertisement for the intern UX/ UI & Communication Design**

Dear Mrs. Coenen and Mr. Schneider,

I, Chanvit Moungyoo, am early writing to apply for an internship in the UX/ UI & Communication Design position at Deloitte from January to May 2022. Currently, I live and study in Bangkok, but I would very much like to move my life to Germany to complete my internship with you. I have been in exchange with Mr. Tim Friedhoff for a long time.

The opportunity presented in this listing is quite fascinating. I fully believe that my technical experience and knowledge will make me a potential competitive candidate for this position. I strive for continued excellence and have a high level of responsibility and patience. I provide exceptional contributions to customer service for all clients. I have developed my Hopibot project that developed with chatbot and 2-Factor authentication system in the project. Not only the web-based application but also the mobile application. Due to the COVID-19 situation in Thailand, I used to design the user interface on a mobile application called CPE win.

As my enclosed curriculum vitae indicates, I have been studying for a Bachelor's degree in Computer Engineering. I have successfully designed the user interface, developed a web-based application and achieved various projects during university. I also have experience in learning and excelling at technologies as needed. I completely understand how decentralised systems work and how to develop them. I implement a decentralised system in my project called DogHUB decentralised e-Learning website.

The paramount experience that has influenced my decision to participate in Deloitte is that I am hard-working, a quick learner, very friendly, ethical and loyal, flexible and a team player to make Deloitte complete the intention. I am also professional in the prototype design tools such as Sketch and Adobe XD and I desire that my abilities and experiences will provide you pride and joy with my potential support for the Deloitte team.

Thank you indeed for your consideration. I look forward to working with you.

Best regards,

Chanvit Moungyoo
